

Google Chrome and cookies

Unusually for a browser – all Cookies are enabled by DEFAULT in Google Chrome. You shouldn't therefore have any issues accessing the members area using this browser. The only reason why you might have difficulties would be if your anti-virus software has changed this. The following steps therefore show you how to check to see if this is the case – and change it if it is.

This “cookie” is necessary because it stores your username and password data for the duration of the browser session. The “cookie”

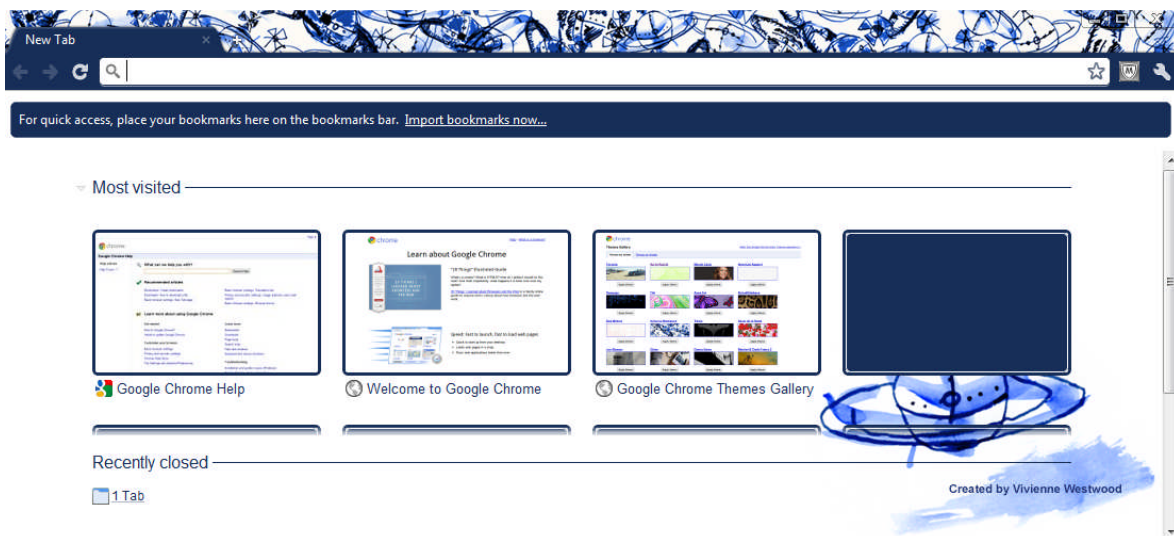

- Doesn't collect any personal information about you
- Doesn't collect location detail
- Doesn't modify your computer in any way

Is erased upon you closing your browser session. Depending on your computer, there maybe a slight delay in this upon exiting your browser – but believe us – it is erased !!!

How to check the cookie status in Chrome and change it

Step one

Start Google Chrome – you should see a window similar to the one below (It won't be exactly the same because on our test version, we have installed a custom theme)

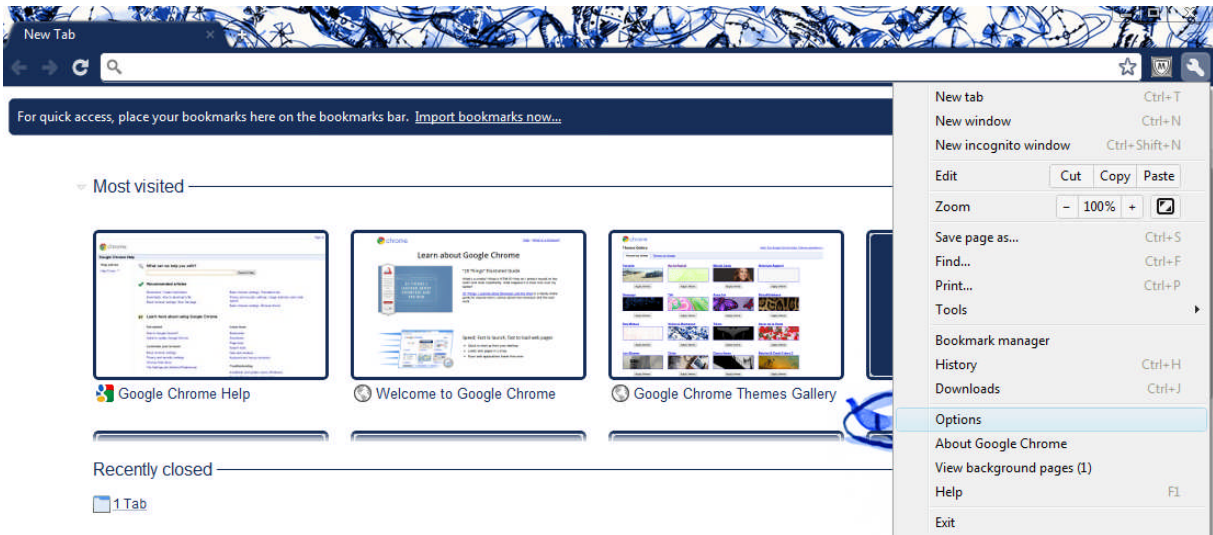

Step two

In the top right hand corner – you should see a spanner as in the picture below

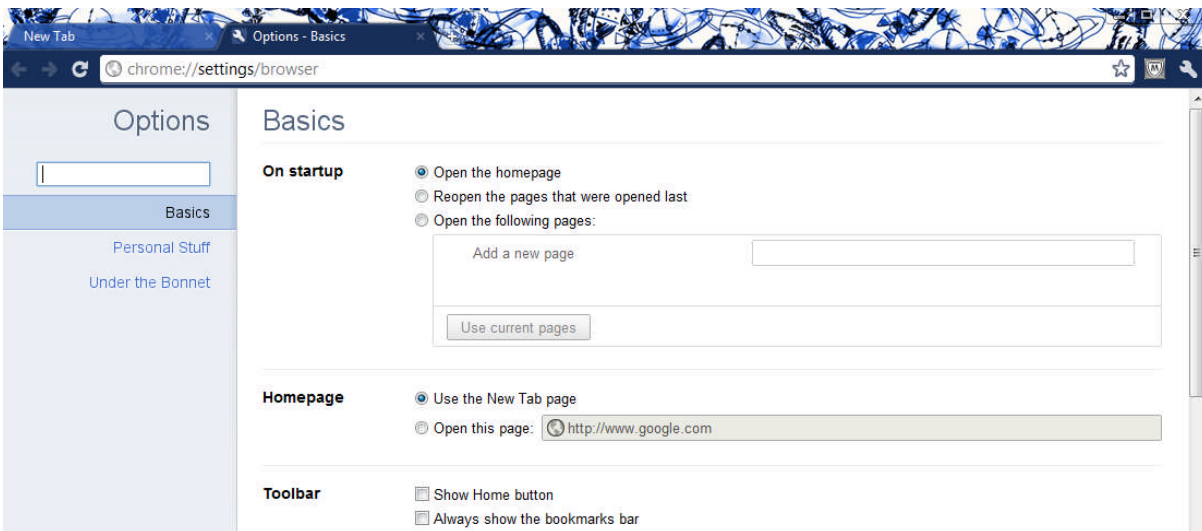

Click on the spanner – you'll see the following window

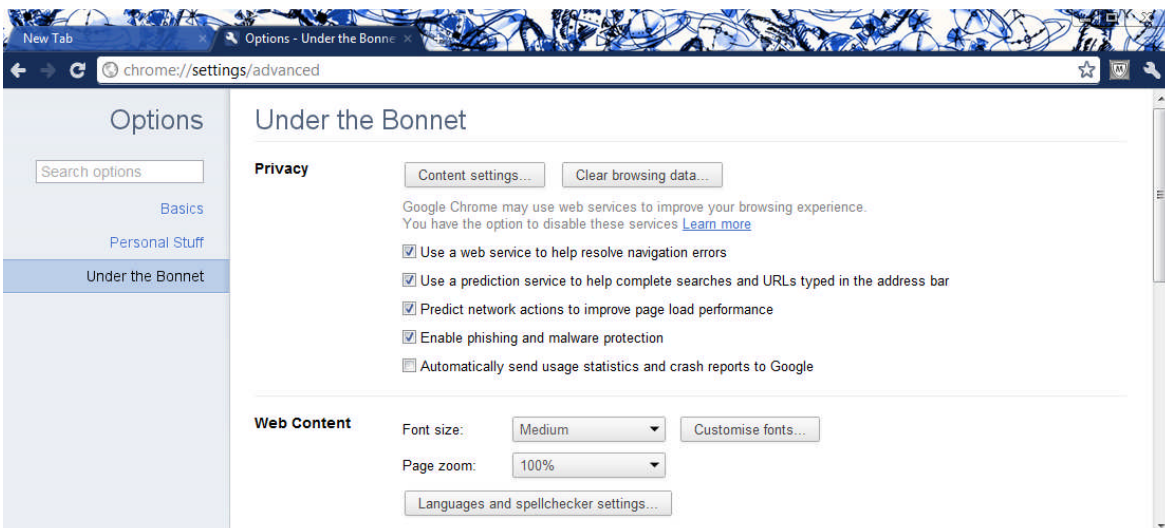

Step three

Click on the menu item "Options" – you'll then see the following screen

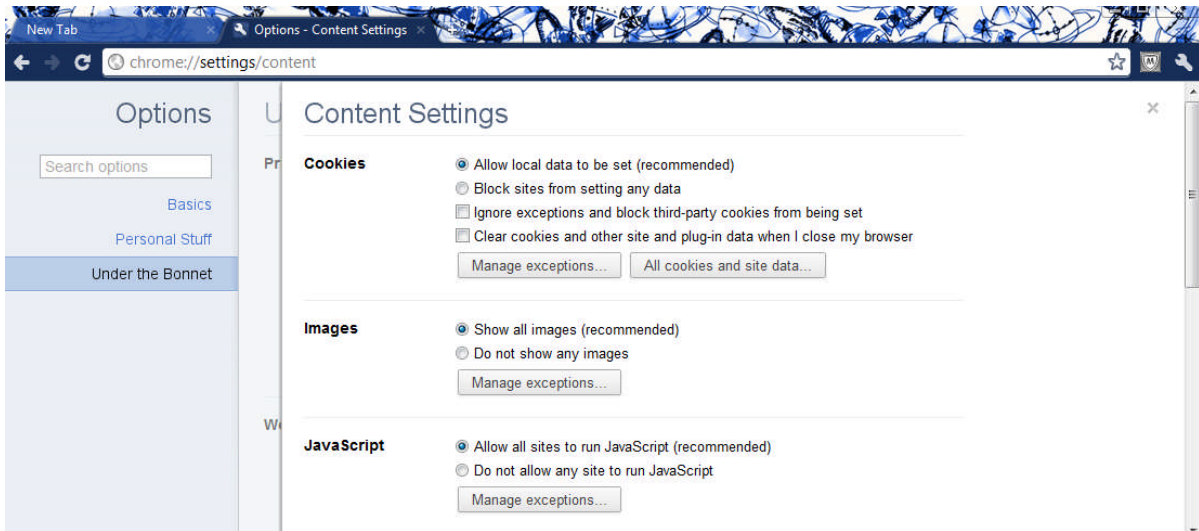

Step four

Click on the "Under the bonnet" option on the left hand menu, you'll see the following screen

Step five

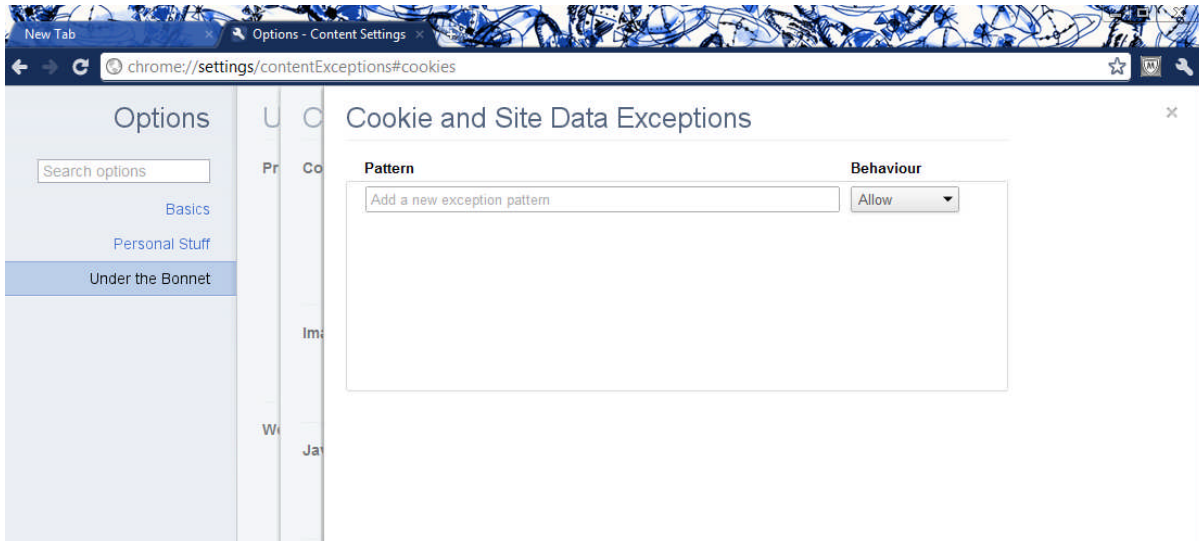

Click on the “content settings” option on the top line item – just to the right of the privacy heading, you’ll see the following screen

If Google Chrome has not been modified – then you should see that the radio button next to the “Cookies” option is set to “Allow local data to be set” (recommended)

Step six

Click on the “manage exceptions” button – you’ll see the following screen

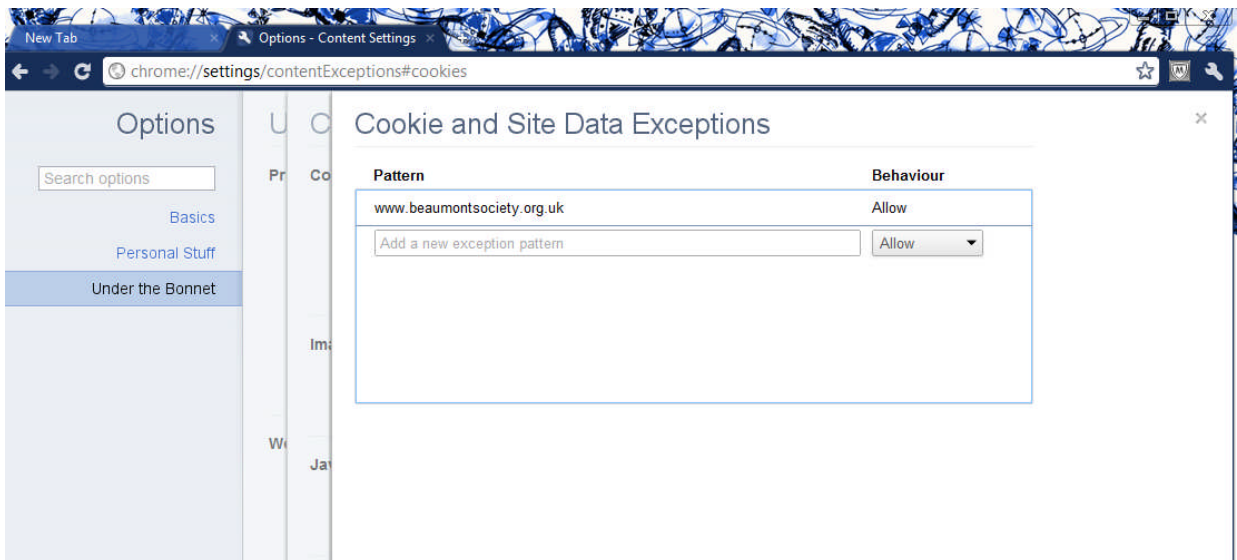

Step seven

In the pattern window – type in the following

www.beaumontsociety.org.uk

then click on “Allow” – you’ll see the following screen

This ensures that when you visit the Beaumont website – all cookies are accepted for our site by default.

Step eight

That's it !!! you're done !!! Click on the cross in the top right hand corner to shut the window – this saves your changes.
